

Natural Cork

MASILVA USA
THE PERFECT FIT FOR YOUR WINE

Natural wine corks are preferred for all types of wine, aging periods and bottle formats. No other natural product offers this combination of visual appeal, neutrality and consistent sealing qualities. Our innovative custom-designed cleaning processes produce corks that exceed the highest industry standards and effectively volatilize potential TCA and other off-aroma molecules from the cell structure of natural cork.

We offer a full range of grades ranging from near visually perfect for ultra-premium wines through value priced corks intended for high-volume labels. Each grade is available in different washes and multiple standard lengths. Custom sizes are also available.

Technical Specifications

Dimensional

Length	54 mm, 49 mm, 45 mm, 38 mm; nominal \pm 1.0 mm
Diameter	24 mm; nominal \pm 0.5 mm*
Ovalization	<1.0 mm

Physical

Moisture	4%-7% moisture content
Dimensional recovery	>96%
Resistance to boiling water	no disintegration

Functional

Extraction force	15 daN – 45 daN (coated corks only)
Sealing ability	no leakage at 1.2 bar
Capillarity	<1 mm

Washes	MSB240, MSN40, MSN140
